

Python

Task 1

Написати програму текстового входу у систему.

- * передбачити багатократне введення
- * передбачити багатократне введення(<3)

A terminal window showing a login process. The text 'localhost login:' is followed by 'root' in a red box, with a red arrow pointing to it from a red box labeled 'Username'. Below this, 'Password:' is followed by an empty red box, with a red arrow pointing to it from a red box labeled 'Password'. The next line shows 'Last login: Sat Mar 14 01:09:20 on :0'. The final line shows the prompt '[root@localhost ~]# _'.

```
localhost login: root
Password:
Last login: Sat Mar 14 01:09:20 on :0
[root@localhost ~]# _
```
